

ADRIANE DAVE M. FERNANDEZ

Computer Engineer

a.davefernandez@gmail.com · linkedin.com/in/adridavefernandez

PROFESSIONAL OBJECTIVE

Computer Engineering student at the University of the Philippines Diliman with practical experience in data management, technical research, and process documentation. Microsoft-certified in Excel and PowerPoint, with programming fundamentals in Python, HTML, and CSS.

PROFESSIONAL EXPERIENCE

Documentation Member / Video Editor — Engineering Radio Guild, UP Diliman

January 2026 – Present

- Create video content for organizational events and media campaigns, covering concept development, footage selection, editing, audio, and final production.
- Produced event teasers, music videos, same-day edits, and recap videos for Engineering Radio Guild and its subproject, Chill Ikot.
- Collaborate with fellow organization members to develop content aligned with event themes, branding, and publication requirements.
- Manage video projects from raw footage to final export while working within event schedules and production deadlines.

Editing Tools: Adobe Premiere Pro · CapCut · Canva

Intern — Nidec Control Techniques

Jun 2023 – Sep 2023

- Met all assigned Key Performance Areas (KPA's), consistently delivering research and reporting outputs within established deadlines.
- Managed, cleaned, and validated datasets in Google Sheets, ensuring accurate and reliable records for client reporting.
- Conducted client-specific research and synthesized findings into concise, decision-ready insights to support business requirements.

Executive Assistant — Triple A & C Enterprise

Jan 2020 – Feb 2021

- Prepared and validated client quotations, verifying pricing, product specifications, and order details prior to release.
- Developed and maintained a centralized database of historical quotations, improving the efficiency of quotation retrieval and reference.
- Assisted with administrative and operational tasks, ensuring accurate documentation and timely completion of client-related requirements.

PROJECTS

UPD Eats — Full-Stack Developer

Next.js 14 · React · TypeScript · Supabase · PostgreSQL/PostGIS · Leaflet · Tailwind CSS · Vercel | AI-Assisted Development: Claude

- Designed and developed a full-stack food discovery platform for UP Diliman students to explore campus food establishments, landmarks, and location-based information.
- Built the application end-to-end, covering frontend development, backend architecture, database design, authentication, geospatial features, and deployment.
- Used Claude throughout development for architecture planning, code generation, debugging, feature implementation, and iterative refinement.

TAC Quotes — Triple A & C Enterprise — Full-Stack Developer

Next.js 16 · React 19 · TypeScript · Supabase · Tailwind CSS · Zod · React-PDF | AI-Assisted Development: Claude

- Designed and developed a full-stack quotation management system for creating, managing, tracking, and retrieving client quotations.
- Replaced the company's manual spreadsheet-based quotation workflow with a centralized digital system.
- Built the system end-to-end, including database structure, backend logic, user interface, authentication, PDF generation, and deployment.

Mathematics Tutorial Website — Web Developer

Wix

- Designed and structured a collaborative mathematics tutorial website, organizing educational resources into an accessible online learning platform.

Price List Database — Data Management

Microsoft Excel

- Centralized and organized company product pricing into a structured Excel database, creating a maintained reference for quotation preparation and price verification.

EDUCATION

Bachelor of Science in Computer Engineering
